Subject: OTFD EMS Response Times

Board Officers

I will be stopping by tomorrow at 3 PM to see what response time data you have to share. Please rest assured that I have no desire for any “gotcha” moments for BOT or OTFD.

just think -

- Response time is important, especially for cardiac arrest
- We should have a continuous improvement effort to make it shorter by small steps, if nothing else
- We should make our performance match our standard (whatever our standard is)
- The community should understand this issue and have input as to their desired response time.
