**Subject:** TwpMgr. Email 2017-001 - Three Questions About EMS Response Time

I heard a couple of weeks ago that the EMS response time data for 2017 from January 1 to a very recent date -

1. has been analyzed properly by Scot Rosati at the direction of Paul Strelchuk
2. shows a longer than 12 minute 90 % fractile response time.

Can you verify or refute these two pieces of information?

Bob Yager
